Floor plan reference only

**Please note:**

It is not illegal for children to sit in the dinette seats without booster seats, fastened with lap belts only. The purpose of the booster seat is to raise the seating level of the child in order to avoid the seat belt being at throat level, thus eliminating the danger of choking the child during brisk braking. In vehicles that are equipped with lap belts only, such as the C-XLarge motorhome, this risk is not present. Therefore children of approx. 5 years of age or above, would be allowed to sit in the dinette seat fastened with a lap belt only. However, please note that it is ultimately up to the customer to decide. Four Seasons RV Rentals will offer guidelines but will not make any decisions in this regard.
